## Books About Hostas:

*The Book of Little Hostas: 200 Small, Very Small, and Mini Varieties.* Michael Shadrack, Kathy Guest Shadrack and Diana Grenfell as a Consultant Editor. Published 2010 by Timber Press. This book focuses on the many small or mini hostas available and offers chapters with an introduction to hostas, special tips on growing and creating spaces for little hostas and companion plants. It includes many beautiful photographs and is completely indexed. If your garden is as full as mine, this is highly recommended.

*The Color Encyclopedia of Hostas* by Diana Grenfell and Michael Shadrack. 1<sup>st</sup> Edition. Timber Press, 2004 - Gardening - 407 pages. And *The New Encyclopedia of Hostas* by Diana Grenfell and Michael Shadrack. 2<sup>nd</sup> Edition published 2009.

*Field Guide to Hostas* by Mark Zilis. This book presents a totally revised and expanded version of the immensely popular 'Hosta Handbook', published in 2000. Mark Zilis' FIELD GUIDE TO HOSTAS ©2014. 7 1/2" by 8 7/8", 428 pages, 1200 colour photos, laminated soft cover, ring binding for ease of use and durability. ISBN # 978-0-9679440-2-9.

*The Hostapedia, An Encyclopedia of Hostas* Mark Zilis. Published 2009 by Q and Z Nursery. The following ISBNs are associated with this title: ISBN - 10: 0967944015 and ISBN - 13: 9780967944012. Many hosta nurseries carry it.

*Timber Press Pocket Guide to Hostas* by Diana Grenfell and Michael Shadrack. Published 2007. A much smaller book - only 212 pages, but it still touches on over 800 hostas and included 302 photographs. The first 27 pages are devoted to general hosta topics including lists of hostas for specific purposes including lists of various colour categories, outstanding flowers, ground cover, and edging. The hosta descriptions are alphabetical and the final 14 pages are devoted to nursery sources, a glossary and an index.

2003 'Regal Splendor'	2012 'Liberty'	2021 'Wheee!'
2004 'Sum and Substance'	2013 'Rainforest Sunrise'	

#### Companion plants

Companion plants in the hosta garden include spring bulbs. There will be a messy period until the foliage is pulled out, usually in mid-June, but tulips look lovely with emerging hostas as do other spring bulbs.

I also use various Astilbes, Ferns, Heucheras, Brunnera, Columbine, Campanula, Digitalis and daylilies of appropriate scale. I had Pulmonaria, but tired of picking out seedlings all over my entire garden and have mostly removed it.

For annuals, I've used Impatience, snapdragons and Coleus.

I have quite a bit of sedum at the edges of my gardens but suspect it may provide a haven for slugs.

Not a plant, but for the hostas in pots, I use decorative rocks on the soil surface to discourage digging squirrels.
